

Finding
HCI students turn to their peers when they have questions or need help

Design Implication
Peer collaboration can be leveraged to improve access to difficult-to-obtain information

Finding
First year HCI students need more help building their portfolios

Design Implication
Design should create a new space for portfolio development, feedback and possibly, opt-in activities

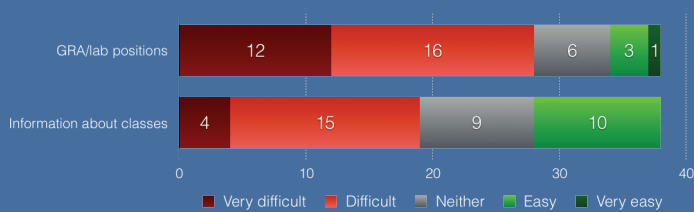

I need more help building my portfolio

Finding
Students have the greatest difficulty accessing information related to finding GRA/lab positions and deciding which classes to take

Design Implication
Improving access to these types of information requires the creation of new content

Finding
Students have trouble tracking important information like deadlines, events, posts, and resources

Design Implication
Shared resources and communications should be easy to integrate into storage folders and calendars

It's difficult to keep track of all the information I receive each day."
